DETAILED ACTION

Amendment filed on April 4, 2000 is acknowledged. Claims 1-4 are canceled. Claims 5-8 are pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Stylli (WO 98/52047).

Stylli teaches an automated and integrated system and method for rapidly identifying chemicals with biological activity in liquid samples. Stylli teaches a storage and retrieval module/inter-modular transport system comprising storage location for storing a plurality of chemicals in solution in addressable chemical wells, a chemical well retriever having programmable selection and retrieval having programmable selection and retrieval of the addressable chemical wells and having a storage capacity for at least 100,000 addressable wells. (See pg 4, Lines 4-8) The storage and retrieval module/inter-modular transport system is operably linked to at least on plate buffer that loads and unloads the addressable chemical plates in a predetermined order that is either dependent or independent of the order of selection of the addressable chemical plates. (See pg 13, Lines 21-28) Stylli further teaches a sample transporter/central transport system to transport the selected addressable chemical wells to the sample

Art Unit: 1743

distribution module and optionally having programmable control of transport of the selected addressable chemical wells. (See pg 4, Lines 16-19) Stylli further teaches sample transport means can include conveyer belts, articulated robotic arms, slide mechanisms, automated guided vehicles and the like as known in the art. (See pg 36, Lines 16-19) Stylli further teaches the definition of workflow can be performed by the scientist interface software. A graphical user interface is used to build an assay or other liquid sample process on a computer screen from the various workstations that exist in the system. (See pg 50, Lines 10-12)

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jyoti Nagpaul whose telephone number is 571-272-1273. The examiner can normally be reached on Monday thru Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
